

Guidelines for making the OCAMI Reports

(22 April 2021 version)

1 Guidelines for OCAMI Reports

To the proposer of the adapted Joint Usage/Research Project at Osaka City University Advanced Mathematical Institute (OCAMI).

After finishing the Joint Usage/Research Project, please submit the results by the form of the OCAMI Reports.

1. Beginning part (**Required items**):

(1) Front cover:

- Title of Research Project
- The names of organizers
- The period
- Abstract on the project
- Mathematics Subject Classification, Keywords and phrases

(2) Preface by the proposer (organizers)

Please include the following information.

- Purpose
- Activities performed
- Achieved results

Please prepare (1) and (2) by using the format of OCAMI Reports (`main.tex`). There are two kinds of formats: In the **PDF \LaTeX format** you can enter English letters only and in the **Lua \LaTeX format** you can enter both English letters and Japanese letters. Please choose either format according to the intended use.

2. Main body (free format)

The main body of the report can be prepared in any format.

For example,

- put the abstracts of research presentations together,
- collect the slides of the research presentations,
- ask the research presenters to write more detailed report,

etc. But you don't have to stick to this. The research organizers can choose any format.

2 Remarks

1. The volume of the OCAMI Reports will be assigned by OCAMI.
2. The OCAMI Reports will be registered in the institutional repository of Osaka City University and will be assigned a DOI.
3. OCAMI Reports will be put on the web page of OCAMI: MEXT Joint Usage/Research Center on Mathematics and Theoretical Physics.

3 Comments

- OCAMI provides the format for preparing the abstract of the research presentation `abstract.tex` which works with the `main.tex`. You may use this format if you wish.
 - ▷ By using `main.tex`, you can include the abstract file (`abstract.tex`) and the PDF files of the slides to the body of the OCAMI Reports.
 - ▷ In that case, the commands for creating the Table of Contents is prepared.
