

***The 16th Osaka City University International Symposium  
on Dynamic Molecular Devices***

**Date: November 9, 2011**

**Venue: OCU Media Center**

**Organized by Graduate School of Science, OCU**

**Co-organized by OCU Priority Research Project on Dynamic Molecular Science Innovation  
and OCU Graduate School Attractive Education Project & JST-CREST Research Program  
on Dynamic Molecular Devices**

***Poster Presentation*** (10F Meeting Room SA)

10:00~11:30

***Invited Lectures*** (1F Culture-Interchanging Room)

13:25– Opening

***Chair Prof. Masatoshi Kozaki***

13:30– Dr. Shuichi Suzuki (Osaka City University)

“Redox and Magnetic Properties of Trinitroxide-Substituted Trioxytriphenylamine”

13:50– Dr. Jonathan. P. Hill (National Institute for Molecular Science, Tsukuba)

“Surface Mobility, Structure Modulation and Allosteric Effects of Supramolecules”

***Chair Prof. Masakazu Hirotsu***

14:45– Dr. Hiroshi Ito (Osaka City University)

“Dynamic Chirality Conversions on Metal–Cyclen Complexes”

15:05– Prof. Takafumi Ueno (Kyoto University)

“Coordination Chemistry Designed on Protein Assembly”

***Chair Prof. Satoshi Shinoda***

16:10– Prof. Yun-Bao Jiang (Xiamen University, China)

“N-Amidothiourea Based Anion Receptors”

17:00 Closing

**Contact: Prof. Satoshi Shinoda**

CREST (JST) and Department of Chemistry,

Graduate School of Science, Osaka City University
