

講 演 者： 栗屋隆仁（九州大学大学院数理学府, 日本学術振興会特別研究員）

タイトル： Remark on a spin refinement of the perturbative invariant

In this talk, we will give a brief review of a spin refinement of the perturbative invariant defined by A.Beliakova, C.Blanchet and T.Le, and we will try to construct a invariant of spin 3-manifolds. When the time allows, we talk on some related topics.
