

List of Poster Presentations

Poster ID	AUTHOR	AFFILIATION	TITLE
PS1	Kojima, Ryota	SOKENDAI	Geometry of the 2-loop MHV amplituhedron
PS2	Kiyoshige, Kazuki	Osaka City University	Selection Rules for Schur Multiplets in 4D N=2 Superconformal Field Theories
PS3	Furukawa, Tomohiro	Osaka City University	ABJM Matrix Model and 2D Toda Lattice Hierarchy
PS4	Yano Katsuya	Osaka City University	Multicritical behavior of Unitary matrix model with logarithmic potential
PS5	Yatagai, Yoshiki	Osaka City University	Fermion mass hierarchy in grand Gauge-Higgs unification
PS6	Horikoshi, Atsushi	Tokyo City University	Hidden Nambu mechanics: Semiclassical dynamics
PS7	Ishii, Takaaki	Kyoto University	Black resonators and geons in AdS ₅
PS8	Negishi, Hiroyuki	Osaka City University	The gravitational wave background induced by nonlinear interactions between isotropic inhomogeneities and anisotropic inhomogeneous density perturbations
PS9	Yoshino, Hirotaka	Osaka City University	Gravitational Waves from Axion Cloud around a Rotating Black Hole
PS10	Takahashi Kazuma	Osaka City University	Imaging gravitationally collapsing star by numerical calculation
PS11	Matsuno, Satsuki	Osaka City University	Monodromy of Killing equation
PS12	Sawada, Takahiro	Osaka City University	Gravitational Wave Telescope KAGRA, Signal Reconstruction and Calibration
PS13	Tsuchida, Satoshi	Osaka City University	The transfer functions and estimation for their systematic errors on the bKAGRA phase-1 operation
PS14	Miyamoto, Akinobu	Osaka City University	Gravitational wave astronomy using distant binary black hole mergers
PS15	Omura, Yugo	Osaka City University	NICHE: High-Energy Cosmic Ray Observation by Detecting Air Cherenkov Light
PS16	Fujiwara, ryota	Osaka City University	Ultra-high-energy cosmic ray measurement, TALE experiment
PS17	Kato, Kohei	Osaka City University	Isotopic shift of atom-dimer Efimov resonances in K-Rb mixtures
PS18	OBARA, Ken	Osaka City University	Vortex line density of Superfluid suction vortex
PS19	Sato, Koji	Osaka City University	Power dependence of vortex emission generated by vibrating wire in He II
PS20	Hamazaki, Kosuke	Osaka City University	Vortex Emission from Turbulence Produced by Counterflow in Superfluid ⁴ He
PS21	Tokuda, Masashi	Osaka University	Magnetoresistance measurements in superconducting Bi/Ni nanowire
PS22	Takagi, Daijiro	Nagoya University	Theory of odd-frequency pairing in Kitaev chain
PS23	Han, Junsik	Osaka City University	Vortex phase separation in two-component Bose–Einstein condensates in two-dimensional traps
PS24	Inui, Sosuke	Osaka City University	Dynamics of fine particles due to quantized vortices on the surface of superfluid ⁴ He
PS25	Teratani, Yoshimichi	Osaka City University	Three body correlations in non-equilibrium current through SU(N) Anderson impurity
PS26	Tsutsumi, Kazuhiko	Osaka City University	Effects of asymmetric couplings and bias voltages on nonlinear transport of a local Fermi liquid
PS27	Kemi, Takuro	Osaka City University	Fermi-liquid corrections to nonlinear transport through Anderson impurity at finite magnetic fields
